

FRASER ISLAND

CREEPER

(V**ABCD) *Tecomanthe hillii*

is a hard to get spectacular creeper from Queensland's World Heritage Fraser Island. Big gorgeous bright pink bunches of flowers in summer. This is a small bushy climber with lovely glossy foliage. Grows in swampy and sandy creek bed locations. Will grow in all mild climates but will need special winter protection in cooler inland locations.

...Priced at \$12.90 (180 Parries) or 3 for \$29

CORDYLINES

Cordylines give colour to your garden all year round.

In spring & summer you can cut them back and they will grow new multiple heads. Plant the cutoff head it will easily take.

Good indoors but don't overwater in winter. For warm coastal climates. If you want bright colour make sure you fertilise each year.

Part to full shade or morning sun.

...Priced at \$7.90 each
or 6 different colours for \$39

THAI BEAUTY 'MAUVE'

(1mAbcD) *Globba winitii* is just so beautiful a Ginger it will stir your imagination to new heights with its long trailing (20cm) mauve bracts & gold flowers. T

The leaves are a delicate pale green. The overall appearance is sensual and delicate, but this is one tough plant and the flowers last for ages. This is a deciduous perennial plant and the bulb should be kept warm and dry over winter but they do not rot easily. In spring Thai Beauty will then grow, mulch and flower rapidly for you. From the forests of Thailand it is best suited to shaded areas, patios and indoors. Excellent for pot culture. As a deciduous perennial it should be OK in most climates particularly in a pot. Keep moist in a well drained situation. Shade.....Priced at \$14.90 each (300 Parries)

Rhizomes
Rhizomes June - October

VARIEGATED SHAMPOO GINGER

(1.5mABCD) *Zingiber zerumbet*

'Darcey'.

Gorgeous plant & flower arrangement with amazing Rhizomes and level cones that turn red with a yellow flower coming forth from under every scale.

Very bright white variegated foliage. As this is a deciduous plant in winter it can be easily be grown in southern areas. Shampoo is made from the milky substance in the cone. Full sun to light shade. Deciduous.Priced at \$14.90 each.

Plants termed **Gingers** come from several different families and many varying species. They are usually associated with the tropics because of their lush foliage, amazing flowers and lovely scent. Many however are native to high altitude areas in Southern Asia and are tolerant of cooler climates. The **deciduous** gingers come back and flower reliably and quickly in spring. Many gingers will grow in warm temperate gardens if given a protected, well drained position and plenty of mulch. All are clumping plants and many, including the *Hedychium* species grow on a strong rhizome which is a starch filled thickened root. As a rule the Gingers prefer a humus rich, moist but well drained soil in a partly shaded position. or morning sun. However with good moisture on hot days will take full sun also. Similar to Gingers in some ways the spectacular **Heliconias** also grow on a rhizome. In cooler warm temperate climates the foliage may suffer over winter but can be cut back in early spring for new foliage to quickly re-establish. They for very long periods in summer. Many can be grown in pots and some make

good indoor plants. Most are excellent for cut blooms and some are sensational. Gingers & Heliconias are fast growing and rewarding plants for you to grow. You can use them to turn any size garden into a lush tropical looking garden where you can relax.

There is a lovely array of them and we will be bringing more to your doorstep over the years. Sometimes they will be released in this list prior to our monthly catalogue. Our plants are sent in pots 140 mm deep and 70mm wide across the top.

Worlds Best Climbers

Pamianthe peruviana

This is an extreme rare plant from Peru from the Family Amaryllidaceae. Its huge white & green striped flowers span 16cm. They are highly fragrant. The sword like foliage is soft and thick. Reported extinct in its native land due to habitat destruction. Difficult & slow to propagate. Grows as an epiphyte....so needs to be treated like an orchid. This is one of the worlds most sought after plants. *Read Jacob Uluwehi's comments at orchidforum.com*

We have a few only. This is a small seedlings about 300mm tall about 4 years off flowering.

RED GINGER LILY

(1.5m *ABCD) **Hedychium coccineum** will give you incredible 300mm long sprays of red to salmon fragrant butterfly shaped flowers in Summer. Each spray will last for weeks. Lush tropical foliage. These are a prolific grower and can be grown in cooler areas as long as the rhizome is not frozen. Cut your plant back to the ground after flowering and it will shoot and multiply for you from its underground rhizome. Native to tropical Asia. Part to full shade in well drained conditions. In 100mm pots.

....Priced at \$14.90 each (250 Parries)

...A Painted Fascination... THAI AGLAONEMA No.4

(50cmAD) Amazing colours can now be yours also..Beautifully marked succulent with a pink spine and very heavily pink speckled veins on the dark green leaves. Aglaonemas are soothing foliage plants that are great under dull to Keep on the dry side in temperatures below 15oC. Colour can vary depending on the light intensity. Great in a pot inside in cooler areas or outside or in a subtropical garden. Aglaonema are so easy care you cant go wrong because they love the shade they handle indoor conditions with ease and in warm areas they will light up any garden. Branch readily for you. They are tough & handle a variety of conditions and are relatively pest resistant and long lived.....Priced at \$12.90 each (200 Parries)

....Hard to Get...Very Hard to Get!....

CARDINAL CREEPER

Ipomoea horsfalliae. One of the most beautiful flowering vines with thick shiny crimson flowers about 4cm across. Hard to get & extremely hard to propagate.. thats why they are rarely available. Contrasting black stems. Attractive rounded dark five fingered foliage with a slightly scollaped edge. All warm coastal frostfree areas. Full sun or light shade.

....Priced at \$22 each

RED HOT POKER

Zingiber peninsulare (2mABCD) Exotic foliage and bright red clustered cones will surprise you in summer. Zingiber peninsulare is considered a small shrub and can be grown as a decorative screen beneath tree as they do in their natural environment adding variety to your garden scene and also a great container plant. Native to Thailand. Water regularly. Part Shade. Sent in 100mm pots. Deciduous

....Priced at \$14.90 each (250 Parries)

RED CHRISTMAS

(1mAbcD) **Heliconia angusta** This is a magnificent Heliconia which will amaze you with its striking bright red and white flowers during winter and spring!! The flowers are long lasting and excellent for cut flowers. This is an attractive dwarf clumping variety good in a tub or in the garden. Keep this one in a warm, moist partly shaded position in well drained mix or soil. We expect these will do well in all warm coastal climates.Semi-shade to morning sun. Sent in pots.

....Priced at \$17.90 each (270 Parries)

RED LEAF NATIVE GINGER

(1m*,**RfEdAbD) **Alpinia caerulea**, from the rainforest understorys of Northern NSW and Southern QLD, produces white and purple flowers and attractive long lasting bluey fruit. The fruit is loved by Bower Birds and when chewed has a gingery flavour (as do the roots). It is a clumping upright plant with large interesting shiny leaves. There are only 6 species of Alpinia native to Australia. Light to heavy shade.

....Priced at \$12.90 each (180 Parries) or 3 for \$29

BLACK BAT PLANT

(50cmAbcD) **Tacca chantrieri** produces the most unusual and striking flowers. The Black Bat Plant flower is black with long sinister tentacles hanging downwards. Its leaves are broad and about 40cm long. They are quite hardy once grown up but need to be nurtured over their first winter in cooler climates than tropical. Native of Tropical Thailand and Burma. Likes a real well drained potting mix with good moisture in the summer but keep just moist in the winter. They do not like the cold frosty weather outside so you will need a warm spot, under shelter or inside. Can grow in a protected spot in the garden in sub-tropical and tropical areas otherwise in a pot. Are growing happily outside in Sydneys Royal Botanical Gardens by the Harbour. Keep it under medium/heavy shade. Very large plants 60cm tall in 140mm pots.

.....Priced at \$29 each

Zingiber malaysianum

'Midnight' (70cmAbcD)

This is a stunner with bright basal yellow cone flowers in spring. The long lasting cones later turn to a pretty apricot and pink. The broad luxuriant foliage is very dark green.

The foliage dies down for winter but quickly reemerges in spring with bright fast growing new growth. Only recently discovered in Malaysia. Good in a pot or protected garden positions. Will grow in all warm coastal areas. Part sun to shade.

.....Priced at \$9.90 each (170 Parries)

....*Worlds Largest Flower!..*

TITAN ARUM - SEEDLINGS

Amorphophallus titanum Biggest flower on the planet!! The flower arises from an underground tuber which can grow to 90 kg! It takes several years to get to flowering size. The flower gets to 3m tall & 1.5m wide!! The plant itself comes up & dies down each year & its thick green patterned stem can be 20cm through and usually 3-6 metres tall...it unfurls to a single leaf. A truly unusual sight. The dormant period for it here is winter & this means the plant can be grown in the true flower is inside the green spathe with amazing male & female flower parts. Full sun to part shade. This years seedlings.

.....Priced at \$45 each 1st year seedling \$65...for 2yo plants.

NB. Seeds for 15.90 each, minimum of 3.

BIRD OF PARADISE

(1mFABCD) **Strelitzia reginae** has the exotic bird like flowers in contrasting bright orange and blue. A remarkable plant it is amazingly drought resistant and withstands lows of minus 8oC. Splendid in floral arrangements and as feature plants. Florists are able to sell just a single flower at a premium. Full sun.

.....Priced at \$9.90 each (170 Parries)

EDIBLE GINGER

(1mEdAbcD) **Zingiber officinale**. This is the edible ginger we know so well. Actually it is the

rhizome (thickened root) we use in cooking. Rich green lance shaped leaves and unusual and pretty yellow flowers from a green cone changing to red. It dies down in

winter to reemerge in late spring, growing on its rhizome. Great interest to western medicine used in Chinese and Indian (Ayuvedic) medicine through the ages.

Powerful anti-oxidant and used for arthritis, rheumatism, sprains, muscular aches, pains, sore throats, cramps, constipation, indigestion, vomiting. Why not plant a patch so you can harvest forever later on. Native of Southern Asia and likes warm conditions in part shade or light sun. Sent in pots.

.....Priced at \$8.90 (150 Parries) or 3 for \$23
